

CLIMAS: CLIMAtE change citizens engagement toolbox for dealing with Societal resilience

Last update: July 2024

This project has received funding from the European Union's Horizon Europe Research and Innovation program under the grant agreement No 101094021

Context

Climate change: global emergency with huge social, environmental and economic impacts

Real problem

- Policies act on the visible part of an 'iceberg' but the transformative potential towards climate mitigation and adaptation lies at a deeper infrastructure and mental construct level
- Citizens' recommendations are often not taken up by policymakers
- Groups in situations of vulnerability are excluded (e.g., women and girls, youth, indigenous people, persons with disabilities)

Policymakers, experts and stakeholders' actions are not enough

Expectations

360° citizen engagement: to ensure recommendations are accepted by policymakers

- Inclusivity - gender diversity and intersectionality approach
- Anti-patriarchal and inclusive facilitation
- Value-based approach

**TIME IS RUNNING
OUT!**

PROJECT INTRODUCTION

CLIMAtE change citizens engagement toolbox for dealing with Societal resilience

Proposed solution

CLIMAS project will use **design-thinking in Living Labs and Climate Assemblies** to create **alternative tools that stimulate deliberative democracy** in climate policymaking

05 Share broad and wide: ensure impact

04 Elaborate recommendations: involve citizens in policy-making processes

01 Get ready and explore: identify barriers and facilitators of citizen participation

02 Engage, empathise, empower: co-create the Toolbox

03 Test with end-users: test the Climate change citizens engagement Toolbox in Climate Assemblies

CLIMAS will deliver a climate change citizen engagement Toolbox that is:

- empowering
- engaging
- adaptable to different socio-cultural contexts

Approach

05 Share broad and wide: ensure impact

Continuously deliver training sessions and share knowledge with all relevant stakeholders, including cross-exchanges. Promote empowerment and engagement through dedicated campaigns across the different EU regions.

04 Elaborate recommendations: involve citizens in policy-making processes

Deliver innovative climate assembly guidelines for practitioners, facilitators and policy makers promoting them across Europe.

01 Get ready and explore: identify barriers and facilitators of citizen participation

Start with the identification of barriers, drivers, bottlenecks, and good practices in past Climate Assemblies throughout Europe.

02 Engage, empathise, empower: co-create the Toolbox

Build empathy and define the problem through design-thinking, citizen science and value-based approaches in Living Labs; involve citizens and stakeholders in the co-creation of a Toolbox that is useful to all people involved in Climate Assemblies at any level.

03 Test with end-users: test the Climate change citizens engagement Toolbox in Climate Assemblies

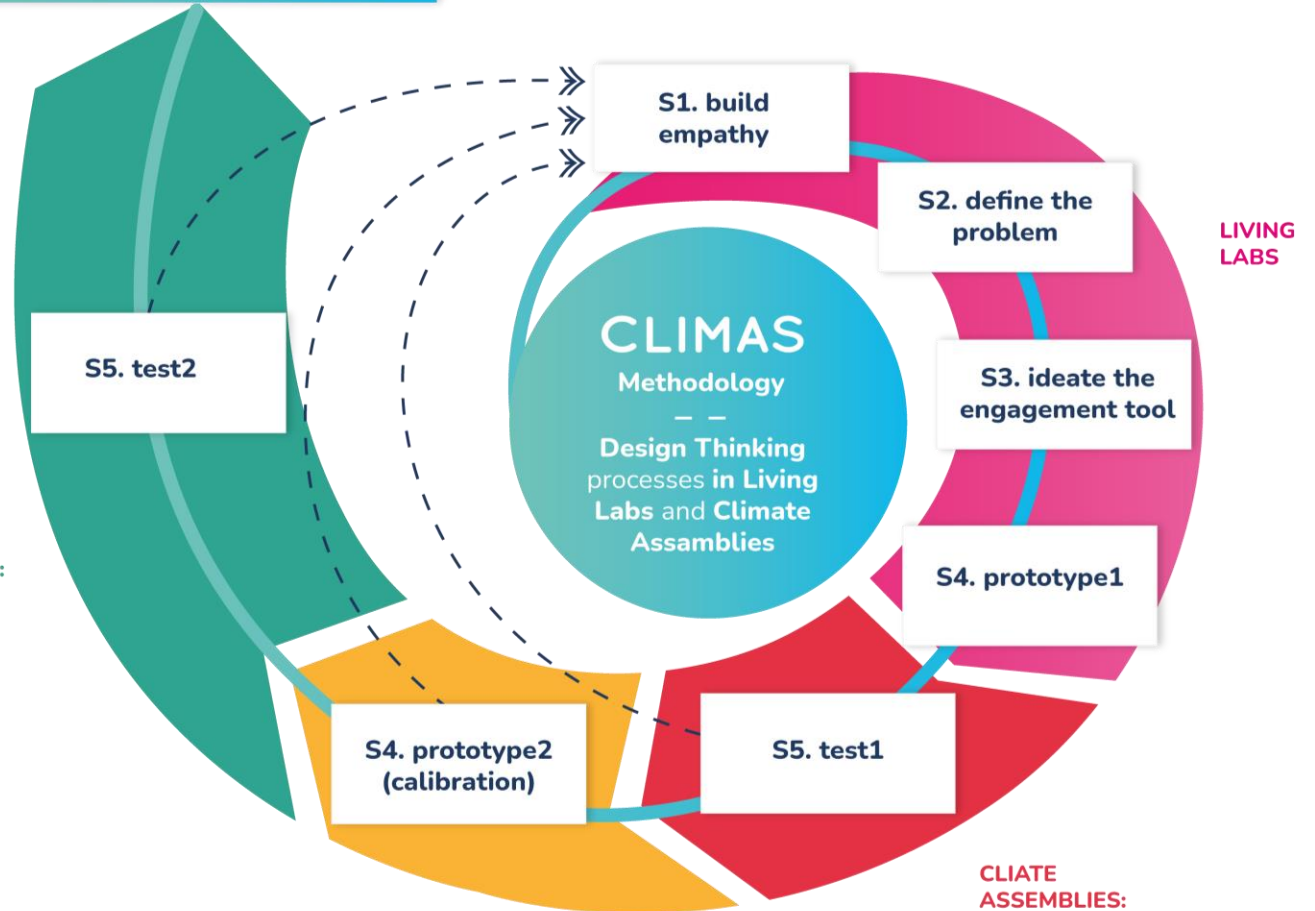

Test the prototype tools in actual Climate Assemblies and Living Labs ensuring that they respond to the needs of people who might benefit from it: Climate AssemblyCA promoters, organisers, participants, and local authorities.

Alternative empowering
and engagement mechanisms

Co-creation process

CLIMATE
ASSEMBLIES:
PLENARY

LIVING LABS

CLIMATE
ASSEMBLIES:
DELIBERATION
ROUND TABLES

Target groups

Climas will involve various target groups in co-creating tools from early phases to final testing. The team will adopt an ethical, user-centric approach.

We aim to include as many communities as possible across EU regions, regardless of physical, cognitive, sensorial conditions, socio-economic or educational levels.

Entrepreneurs

Policy-makers

Experts

Vision

The ambition of CLIMAS is to support a societal transformation to climate resilience (society resilient by design)

- by empowering citizens through an innovative toolbox expected to democratise Climate Assemblies within 150 EU regions.
- by delivering insights and recommendations to support the policymaking process.

Azores

Madeira and Canary Island

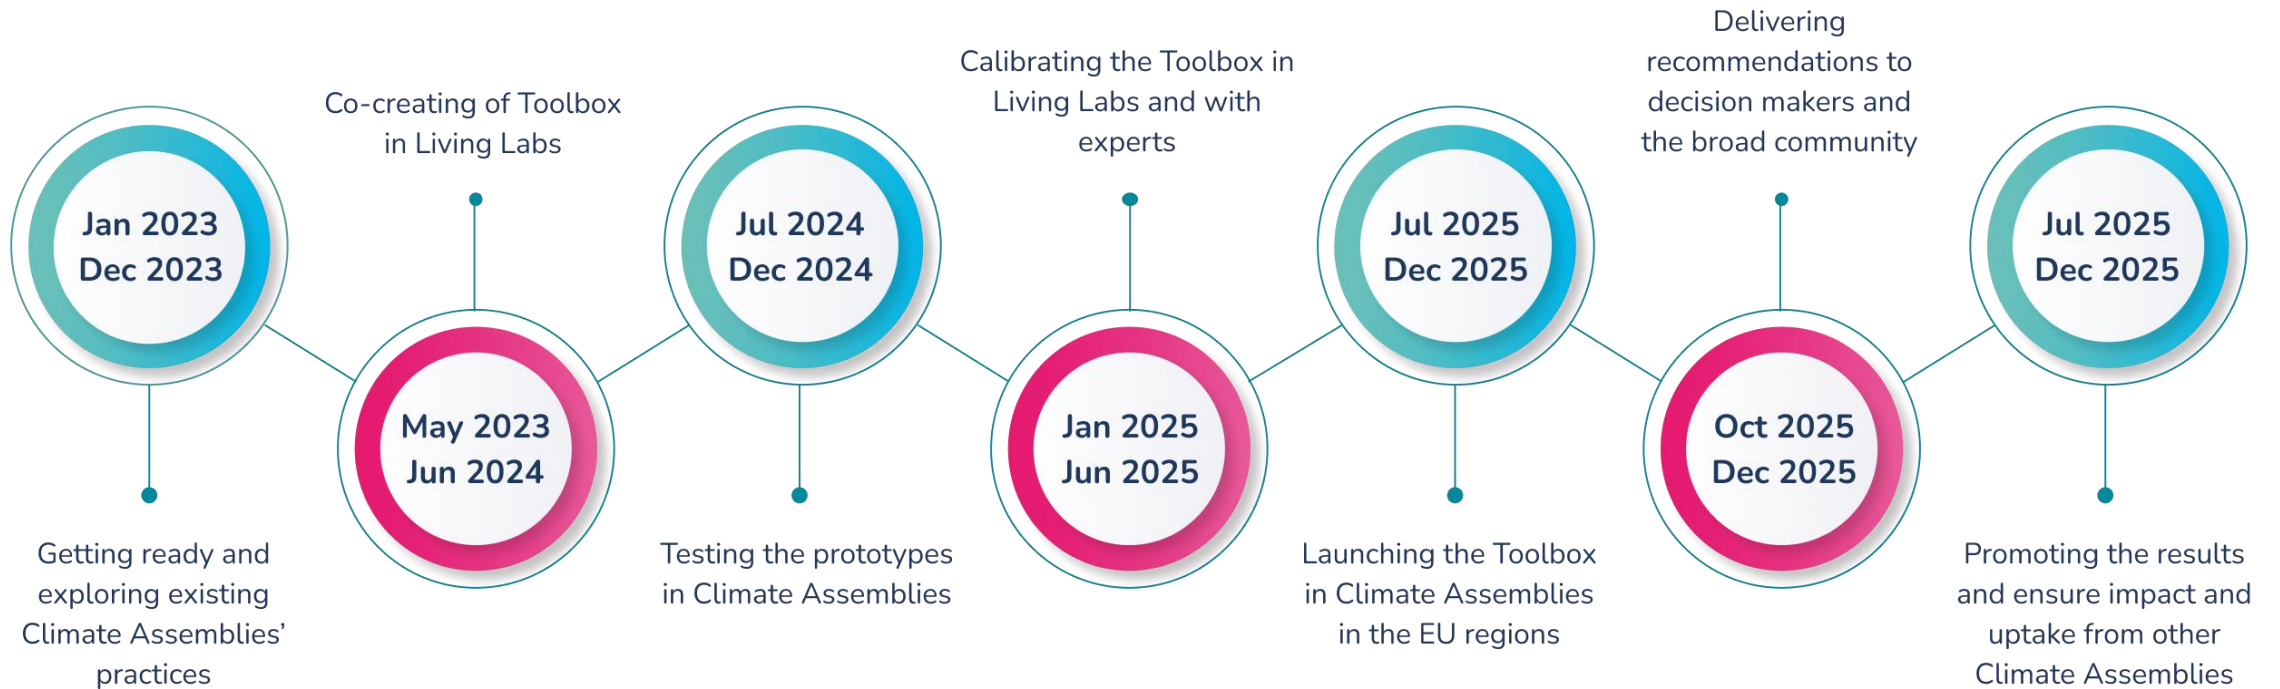

-  Climate assembly
-  Living Lab
-  CLIMAS partner

Biogeographical regions of Europe

-  Artic
-  Boreal
-  Atlantic
-  Continental
-  Alpine
-  Pannonian
-  Mediterranean
-  Macaronesian
-  Steppic
-  Black Sea
-  Anatolian

Proof of success

Duration: 36 Months - from January 2023 to 31 December 2025

EU Contribution: € 2 817 902,50

Coordinator: Vilnius Tech - VILNIAUS GEDIMINO TECHNIKOS UNIVERSITETAS

Scientific coordinator: cambiaMO | changing MObility
