

CLIMAS: CLIMAtE change citizens engagement toolbox for dealing with Societal resilience

Climate assemblies and Living labs are recognised as effective and rational instruments for fostering deliberative democracy in climate policy formation.

The objective of the CLIMAS project is to facilitate a shift towards climate resilience by providing a **cutting-edge, problem-focused climate adoption toolbox** to existing and future Climate Assemblies.

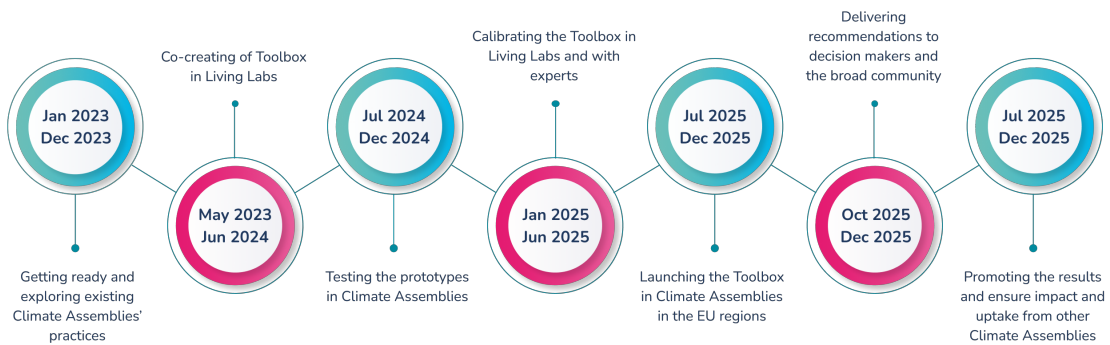

Let the CLIMAS project begin!

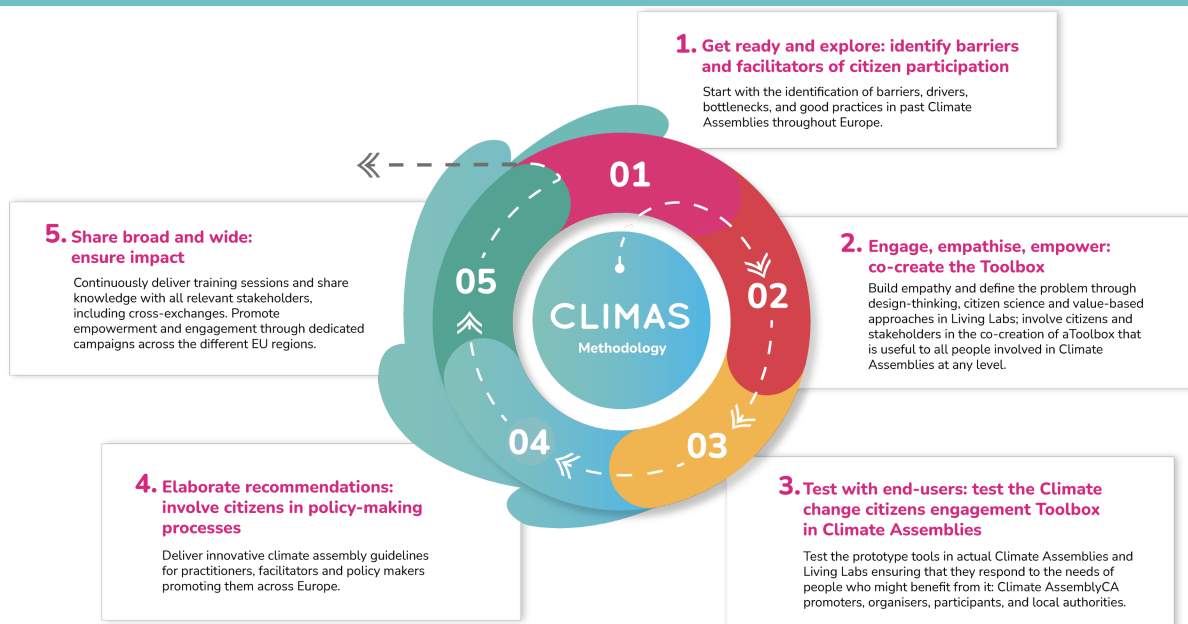

Last January a new EU-funded project was launched with the aim of accelerating the transformation to **climate resilience by improving citizen engagement...**
